Dimitar Petkov

Address: Sadovo 4122, Plovdiv, Bulgaria
Phone: +359 877 531 204
E-mail: mitfreex@gmail.com

Summary:

After many years working in advertising and print products and services, I decided to start a new career path. Two years ago I begin studying software development at SoftUni. I have successfully completed through in-depth vanilla javascript courses. After that I learned basic skills for frameworks like Express for back-end, Angular and React for front-end. As a junior front-end developer with no professional experience, it would be a worthwhile challenge for me to get into your project where I will surely have the opportunity to face real working problems, tasks, concepts and learn professional approaches to solve them in team collaboration.

Work experience:

• 2006 - 2007

Organizer Warehouse at **INDEX-6 Ltd Plovdiv**

description:
